PROFESSIONAL COMMUNICATIONS

HARD WORKING RADIOS

Icom Inc.

Icom, the wireless communication experts

Icom Inc. is a company located in Osaka, Japan, and is a manufacturer of wireless communication products. Since Icom's establishment in 1954, We have had a long record as a trusted manufacturer of land mobile radio, amateur radio, marine radio, navigation products, aviation radio and communications receivers.

Company Profile

Icom quality and Icom reliability

Over 50 years of engineering and production excellence is a part of every Icom product. Using the latest equipment, Icom radios are tested to pass rigorous in-house tests as well as environmental tests to the US Military standard 810 specifications.

Quality & Reliability

Made in Japan quality

Icom is a rare example of an electronics manufacturer that has not shifted production to lower cost countries, but kept its production base 100% in Japan. The Wakayama Icom plant has an advanced production system to produce small volume/multi-model wireless communication products.

Icom, a world brand name

Icom is today recognized as a reliable 2-way radio brand name around the world. Our land mobile radios are used by many professional organizations all over the world, like the United States Department of Defense and the U.S. Marine Corp, who chose Icom as the first Japanese company to supply radios to them.

Icom's worldwide network

Icom products are sold in over 80 countries around the world. Icom has an international sales and service network, including sales subsidiaries in the US, Australia, Germany, Spain and China. Icom is here to support and service our products and your communication needs.

THE SMART MIGRATION ANALOG TO AN APCO RADIO SYSTEM

Digital migration is now an inevitable trend for commercial radio. The IC-F70D, F1721D and F1821D series offer an ideal solution for analog migration. The wide channel allows you to seamlessly add to a current FM radio network depending on the version. The rich FM features such as built-in microphone, a flexible, long life radio for you. The IC-F70D, F1721D and F1821D meet your communication needs. *IC-F70 and F80 only.

Interoperability

The IC-F70D, F1721D and F1821D series is APCO Project 25 (P25) compliant. It ensures interoperability with other manufacturer's P25 digital radios in conventional mode. The radio is programmable digital and/or analog FM modes per channel.

Intrinsically safe version

Versions of the IC-F70/F80 series are available that conform to the intrinsically safe rating of the FM Approvals.

Intrinsically safe : Class I, II, III, Division 1, Groups C, D, E, F, G ;

Nonincendive : Class I, Division 2, Groups A, B, C, D hazardous locations

Connected battery pack : BP-254FM, "Max. Temp. : T3C at 40°C"

Approved options: HM-138, HM-168IS, HS-94, HS-95, HS-97, VS-1SC, UT-109, UT-110, UT-124

AES/DES digital encryption

FIPS-140-2 inside

AES and DES are encryption standards required by public safety agencies. The IC-F70D, F1721D and F1821D series provides secure encryption with DES and AES accordingly when activated with EX-2785 J02 (for DES) and EX-2785 J03 (for AES) activation software. The IC-F70D/F80D versions certified to FIPS 140-2 Level 1 for AES encryption are also available.

TM: A Certification Mark of NIST, which does not imply product endorsement by NIST, the U.S. or Canadian Governments.

IPX7 waterproof protection

The IC-F70/F80 series has solid waterproof* construction. A speaker grill designed for water removal keeps communications clear in inclement weather.

* Submersible for 1m depth of water for 30 minutes, equivalent to IPX7.

Dot matrix, multi-function LCD

The IC-F70/D, F1721/D and F1821/D series have a large dot matrix display to show information with high resolution characters. The display setting is programmable to show one line and 12 characters, or two lines and 24 characters. In addition, the IC-F70/D series shows the functions assigned to the [P] buttons at the bottom of the display.

FROM P25 DIGITAL

To use your existing analog radio resources intelligently, the IC-1821D and F2821D are the smart choice for current –and future –public safety com-

IC-F1821D, F2821D
(10 keypad version)

IC-F1721D, F2721D (Non-keypad version).

Built-in versatile tone signaling

Use the built-in CTCSS, DTCS, 2-Tone 5-Tone or MDC 1200 capability to set up your own talk groups, and have your radio standby quietly when other groups are talking. Up to 10 2-Tone, 8 5-Tone codes can be decoded on a single memory channel.

Zone copy cable for tactical group operation

The tactical group function allows you to copy memory channels to the tactical zone (zone 32) and dynamically regroup memory channels. Using the optional zone copy cable, memory channels in the tactical zone can be transferred from a master radio to other radios.

Other features

- Large capacity Li-Ion battery pack for IC-F70/D series
- Heavy-duty dynamic microphone, HM-148 is supplied with IC-F1721/D, F1821/D series
- Built-in audio compander • 256 memory channels and 32 zones
- Optional man down unit UT-124 (IC-F70/D series only)
- Built-in Voice Operated Transmission (VOX) capability (IC-F70/D series only)
- P25 upgrade is available for analog versions (Optional UT-120 and EX-2785 J01 are required)

LTR™ /CONVENTIONAL/ DIGITAL* MULTI-MODE LAND MOBILE!

Designed and built for advanced communication needs, the IC-F3161/D series handhelds are feature-rich with built-in multiple signalings and LTR™ trunking capability. Two optional slots support numerous extension capabilities including IDAS digital operation.*

* Already installed in IC-F3161DT/DS, F4161DT/DS. Optional UT-126H required.

Basic LTR™ mode operation

Group, selective, and phone call are available in LTR™ mode.

512 memory channels with 128 zones

The 512 memory channel capacity with 128 zones allows you to divide and store a variety of channel groupings for versatile and efficient fleet management.

IDAS, 6.25kHz digital mode ready

The IDAS 6.25kHz digital mode is available with the optional UT-126H digital unit*. (See page 17-18 for IDAS details.)

* Already installed to the IC-F3161/F4161 "D" versions.

Dot matrix, multi-function LCD

The IC-F3161/D series has a large dot matrix display to show information with high resolution characters. The display setting is programmable to show one line and 12 characters, or two lines and 24 characters. The bottom row shows assigned functions to the [P0] to [P3] buttons.

Voting scan

The Voting scan detects the signal strength level of repeater sites and automatically selects the strongest station, useful for roaming between 2 or more repeater sites. Once you program for voting mode in a memory zone, you can easily start voting mode operation by changing the zone setting.

Loud audio output with BTL amp

The IC-F3161/D series employs a BTL amplifier that increases the audio output and the built-in audio compander provides clear, low noise communications.

Other features

- Built-in inversion type voice scrambler and optional UT-109R and UT-110R for higher security
Inversion type voice scrambler is not compatible with UT-109/UT-110 voice scrambler.
- The mode independent setting automatically selects the scanning list, according to the operating channel
- Nuisance delete
- MDC 1200 compatible
- IP55 dust-protection and water jet resistance
- Optional man down unit, UT-124R and lone worker function
- Embedded ESN (Electronic serial number) and more...

NEVER MISS IMPORTANT CALLS

The IC-F50V series offers loud 700mW (typ.) audio, vibration alert and voice recorder functions that let you catch every call. Furthermore, the IC-F50V offers a compact dust and waterproof package that provides reliable communications, and is easy to use in nearly any environment.

Vibration alert function

When a pre-programmed 2-tone/5-tone code or call from a specific user (MDC mode only) is received, the radio vibrates powerfully enough to be felt through heavy clothing.

8 minute voice recorder

When a pre-programmed 2-tone/5-tone code or a SelCall (MDC mode only) is received, the voice recorder automatically starts recording the incoming message. You will not miss an important call even when you are temporarily away from the radio.

700mW (typical) audio output with internal speaker

The IC-F50V series delivers a loud 700mW audio output with the built-in BTL amp. The built-in audio compander provides clear, low noise communications.

IP67, dust-tight and waterproof protection

The IC-F50V series can withstand submersion in 1m depth of water for up to 30 minutes and has dust-tight construction that prevents the ingress of dust.

Other features

- 56(W)×97(H)×36.4(D) mm compact body
- MDC 1200 system programmable
- Inversion type voice scrambler is built-in
- Optional waterproof speaker-microphone, HM-168
- Large capacity Lithium-Ion battery pack, BP-227
- Built-in CTCSS, DTCS, 2-Tone and 5-Tone capability
- Mode-dependent scan • Nuisance delete function
- BTL only version (no vibration alert and no voice recorder) and BTL/Vibration alert version (no voice recorder) available

Not available in some countries. (Not available in the U.S.)

- IPX7 waterproof protection
 - Built-in CTCSS, DTCS, 2-Tone and 5-Tone capability
 - 56(W)×97(H)×36.4(D)mm, compact body
 - Built-in UT-110 equivalent voice scrambler*
 - Inversion type voice scrambler is built-in to all versions
 - MDC 1200 programmable*
 - FM intrinsically safe version available (Ask your dealer for details) and more ...

IC-F43GS

IC-F33GT

ADVANCED STANDARD MODEL

The IC-F33G series is suitable for a variety of needs — large or small, mobile or stationary. Offering advanced features such as wide frequency range, multiple signaling and loud audio, the IC-F33G series is a rugged and reliable 2-way communications tool.

256 memory channels with 16 banks

The 256 memory channel capacity with 16 banks allows you to divide and store a variety of channel groupings. Channel selection can be made easily with a rotation of the rotary channel knob.

Lithium-Ion battery pack

The supplied 2000mAh Li-Ion battery pack, BP-232N, provides 15/16 hours* of operating time. An optional AA size battery case BP-240 stores a charge for years and is an ideal choice for emergency preparedness.

* UHF/VHF, typical operation Tx:Rx: Standby=5:5:90, power save on.

Multiple 5-Tone, Multiple 2-Tone

The IC-F33G series can encode and decode up to 10 2-Tone codes or 32/8* 5-Tone codes on a single memory channel. This is perfect for professionals who require multiple district paging on one channel.

* Encode/decode.

Alphanumeric display

The 8-character alphanumeric display shows channel, zone, tone code and scanning channel names on the display. A separate row of operational icons indicate battery, signal strength, RX/TX and other radio conditions.

Audio compander

The built-in audio compander reduces noise components and provides clear reception even in narrow band use.

Other features

- Optional man down unit, UT-124
- Dust-protection and splash resistance equivalent to IP54
- Wide frequency coverage and wide, middle and narrow channel spacing programmable
- Compact and lightweight body
- MDC 1200 compatible
- Flash CPU for future upgrade

ECONOMICAL STANDARD MODEL

The IC-F3021 series is an economical standard model with durable construction, and simple user-friendly operation. Icom's technology provides you with the reliable performance and the communication quality you expect. Your next best step from a basic radio.

Button control memory channel

The IC-F3021 series has 128 memory channels with 8 zones. Memory channel selection can be made easily with up/down buttons laid out below the PTT button. A large LCD provides at-a-glance convenience so that you can visually confirm with whom you are talking to.

Supports multiple, flexible selective call

CTCSS, DTCSS, 2-Tone, 5-Tone encoder/decoder and DTMF encoder are built-in. The optional UT-108R allows DTMF decode with ANI functions.

Lone worker function

When the radio is not operated for a preset period, the radio sounds a beep and requires you to push any button. If a button is not pushed, an emergency signal automatically transmits and informs a co-worker or dispatcher that something may have happened to the individual worker.

Mode dependent scan

When you change the operating channel, the scanning list automatically changes following that channel setting. It is convenient when you move to a different operating area and change an operating channel, you don't have to change the scanning setting.

Other features

- MDC 1200 compatible
- Optional voice scrambler, UT-109R and UT-110R
- Optional man down unit, UT-124R
- Surveillance function temporarily turns off the LED backlight and beep sound
- Dust-protection and splash resistance equivalent to IP54
- Compact and lightweight body
- Low battery beep function
- Nuisance delete

IC-F14 (rotary type)

BUILT TO LAST, BUILT TO WORK!

The IC-F14/S series is designed to provide simple operation for everyone, and is a powerful and reliable tool for your daily business. Its very durable construction is resistant to shock and vibration. The IC-F14/S series will easily exceed your expectations.

Tough and reliable construction

The IC-F14/S series is built around an aluminum die-cast chassis and covered with a tough polycarbonate casing. This radio is built to last. Its dual slide rail securely locks the battery to the radio. The belt clip is clamped between the radio and the battery, making it nearly impossible to knock loose.

Simple operation

Having only 3 buttons, one volume and one channel knob, the IC-F14/S series does not require special training to use. Positive button action for sure operation even when wearing gloves allows you to get down to the business of communicating without fuss.

Optional board

The IC-F14/S series has an expansion socket for adding an optional board. Individual board options include: voice scrambler, man down and DTMF decoder features.

Most popular signalings built-in

Use the built-in 2-Tone, 5-Tone, CTCSS and DTCS capabilities as standard to set up your own talk groups and quiet stand-by when others are talking. In addition, MDC 1200 PTT ID and emergency call functions are available. (Transmit only)

Other features

- Wide frequency coverage in one version
- Optional voice scrambler, UT-109 and UT-110
- Optional DTMF decoder, UT-108
- Optional man down unit, UT-124
- Multiple 2-Tone, Multiple 5-Tone
- Lithium-Ion battery standard
- LED low battery alert
- TOT function and lock out penalty timer
- 2 step power saver
- Normal and priority scan
- 500mW loud and clear audio
- Optional VOX headset for hands free operation
- Embedded ESN (Electronic serial number)
- Wide/narrow (25/12.5kHz) channel spacing capability, and more...

SIMPLE AND QUICK CONTACT AT ANY TIME

For big or small businesses who need economical and instant two-way communications, the IC-F11/S series provide simple and quick contact at any time. Built-in multiple tone signalings, 3 steps of output power and other superior features are the benchmark in this category.

The on-site communications solution

For small business, hotels, hospitality, landscape, nursery, etc. who need economical and instant two-way communications. Also a wireless intercom solution for large retailers, warehouses, etc.

Simple controls, easy to use

All functions of the radio can be operated with only the transmit button, channel selector and volume knob. All three controls may be operated without removing the radio from your belt. The perfect, simple to use business tool that requires no training to use.

Multiple selective calling functions

Use the built-in signaling capability (2-tone, 5-tone, CTCSS, DTCS) to set up your own talk groups and quiet the radio when others are talking. You can set up selective calls to individuals too. Keep private communications private and eliminate unnecessary interruptions and gossip in the workplace.

Powerful 4 or 5W of output power

Use a full 4 or 5W* when you need it. Increase the range of your transmissions indoors and outdoors where obstacles and walls often challenge other inferior equipment.

* 4W for UHF models, 5W for VHF models.

Military rugged construction

Don't let the lightweight or compact body fool you. This is a military spec. rugged radio that can take abuse and keep working.

Other features

- Compact and lightweight to carry all day
- 16 ch. rotary type and max. 4 ch. simple type
- Optional alkaline, Ni-MH or Li-Ion battery pack
- Wide/narrow capability, and more...

LTR™ /CONVENTIONAL/ DIGITAL* MULTI-MODE PROFESSIONAL MOBILE!

Designed for public safety, transportation and delivery service users, the IC-F5061/D series offers advanced multi-mode operations. This includes advanced multi mode operations, IDAS 6.25kHz digital options, advanced scanning and flexible installation suitable for mobile and base stations. Just try and outgrow this radio!

* Optional UT-126H required.

Built-in basic LTR™ mode operation

Group, selective and phone calls are available in built-in LTR™ mode. MDC signaling is also available with LTR™ mode.

IDAS, 6.25kHz digital mode ready

The IDAS 6.25kHz digital mode is available with the optional UT-126H digital unit*. (See page 17–18 for the IDAS details) * Already installed in the IC-F5061/F6061 “D” versions.

Built-in versatile tone signaling

Use the built-in CTCSS, DTCS, 2-Tone 5-Tone or MDC 1200 capability to set up your own talk groups, and have your radio standby quietly when other groups are talking. Up to ten 2-Tone, eight 5-Tone codes can be decoded on a single memory channel.

IP54 dust-protection and splash resistance (Controller only)

When used with the optional separation kit, RMK-3, and separation cable, the front panel of the IC-F5061/D series can be detached from the main unit. The control head has dust-protection and splash resistance construction equivalent to IP54.

Voting scan

The Voting scan detects the signal strength level of repeater sites and automatically selects the strongest station, useful for roaming between 2 or more repeater sites. Once you program for voting mode in a memory zone, you can easily start voting mode operation by changing the zone setting.

Other features

- The mode independent setting automatically selects the scanning list, according to the operating channel
- Nuisance delete
- Lone worker function
- Built-in inversion-type voice scrambler and optional UT-109R/UT-110R available*
 - * Inversion type voice scrambler is not compatible with UT-109/UT-110 voice scrambler.
- Large dot matrix display and multi-function LCD
- 8 DTMF autodialing memories
- D-Sub accessory connector, ignition sensing line and more...

A FLEXIBLE YET SIMPLE TOOL FOR B&I USERS

With 256 channel capacity and built-in flexible tone signaling, these mobiles meet the demanding needs of today's professionals. B&I users will appreciate the flexible, yet simple design of these MIL SPEC rugged mobiles — from conventional to expanded trunking operation.

Flexible selective calling

CTCSS, DTCS, 2-tone and 5-tone encoder/decoder and DTMF encoder are built-in. These signalings are applicable to a wide variety of selective calling systems to call specific station(s) or control a repeater. The ANI function is available with 2-tone/5-tone and DTMF decoder*.

* Optional UT-108 is required.

256 memory channels

With 256 channels separated into 16 memory banks and identifiable by a 10-character alphanumeric LCD, you can quickly access preprogrammed contingency frequency plans — ideal for wide area, cross-municipality communications!

Face the speaker in the direction you need

The IC-F521/F621 series lets you simply rotate the chassis to face the speaker in the direction you need while the control head remains right side up.

9 programmable buttons

Two pairs of up/down buttons and P0-P4 function assignable buttons allow you to customize functions to meet specific needs.

Other features

- Built-in audio compander
- Backlit keypad
- Independent AF volume knob
- Optional voice scrambler, UT-109 or UT-110
- Selectable channel spacing (12.5/15kHz)
- Stun and power-on password function
- Flash ROM CPU
- VHF 50W, UHF 45W higher power version available

SIMPLE, POWERFUL COMMUNICATIONS

Today's mobile workers need to get information and respond to it immediately, at any time, from any place. Icom's mobile radios meet and exceed these demands with advanced features but simple operation.

8-character alphanumeric display

The alphanumeric LCD indicates channel, bank name and decoded text, etc. Various status icons for such functions as an S-meter and output power, etc., enhance the array of information available to the user.

128 channels with 8 memory banks

Up to 128 channels with 8-character channel names can be stored and divided into 8 banks for flexible channel management.

Advanced 2-Tone/5-Tone systems

2-Tone, 5-Tone, CTCSS, and DTCS encoder/decoder are equipped as standard. Multiple 2-Tone/5-Tone codes are programmable on a channel.

Optional voice scrambler

Optional voice scrambler units, UT-109 or UT-110 allow you operating security. The UT-109 includes up to 32 scrambling codes and the UT-110 includes up to 1020 (4 group × 255 code) scrambling codes with a divided frequency rolling system.

Independent volume knob and 4W (typ.) front-mounted speaker

The IC-F121 series has a front firing 4W (typ.) speaker providing crisp and clear audio. Independent volume knob offers quick operation.

Other features

- Powerful 50W (VHF), 45W(UHF) output
- Selectable wide/narrow channel spacing per channel
- Hook scan function and Hook scan on/off button programmable
- 8 autodialing memories for DTMF and optional decoder UT-108
- 10 scanning lists, normal/priority scan and more...

PRACTICAL COMMUNICATIONS SUPPORTER

These mobile radios provide the operating simplicity to keep your eyes on the road—not the front panel! But don't let the lack of display fool you, there are enough features and functions to meet most commercial demands.

Simple operation with up to 8 channels

4 large programmable buttons with LED indicators maximize use of all functions. An independent volume knob adds to the all-round ergonomic design based on simplicity.

Advanced 2-Tone/5-Tone systems

2-Tone, 5-Tone, CTCSS, and DTCS encoder/decoder and DTMF encoder are equipped as standard. Multiple 2-Tone/5-Tone codes are programmable on a channel. When an optional UT-108 is installed, DTMF decoder and ANI functions are also available.

Optional voice scrambler

Optional voice scrambler units, UT-109 or UT-110 allow you operating security. The UT-109 includes up to 32 scrambling codes and the UT-110 includes up to 1020 (4 group × 255 code) scrambling codes with a divided frequency rolling system.

Independent volume knob and 4W (typ.) front-mounted speaker

The IC-F121S series has a front firing 4W (typ.) speaker providing crisp and clear audio. Independent volume knob offers quick operation.

Other features

- Powerful 50W (VHF), 45W(UHF) output
- MDC 1200 PTT ID and emergency call functions (Transmit only)
- Selectable wide/narrow channel spacing
- Key backlight for easy nighttime operation
- Hook scan function and Hook scan on/off button programmable
- 24-digit DTMF autodial memory
- Programmable LED lighting, and more...

UNIQUE TWO-IN-ONE REPEATERS

The IC-FR5000 series combines superior analog specifications with competitive cost performance. Its slim, rackmount design allows you to install two RF modules in one unit. In addition, the built-in IDAS digital mode paves the way to a future digital migration now.*

* Optional UR-FR5000/UR-FR6000 is required.

Two RF modules in one unit

The IC-FR5000 series has an internal space for installing an optional RF unit, UR-FR5000 series. Two RF modules can be installed in a chassis reducing installation space, and increasing channel capacity. They can be programmed and operated independently.

19-inch rack mount design, 2U height low profile design

The IC-FR5000 series has a rack mount bracket and handles for installation in an industry standard 19-inch rack.

Multiple CTCSS and DTCS tone decode

The IC-FR5000 series detects multiple CTCSS and DTCS on a channel (up to 16 tones on a table) and downlinks (transmits) the received signal with a specified tone. This function is useful for sharing a channel with multiple groups.

Base station operation

The IC-FR5000 series has 5 programmable buttons, 12-digit dot-matrix display and 32 memory channels allowing you to use the repeater as a base station.

Other features

- Programmable accessory connector (D-sub 25-pin) for connecting trunking controllers or other external devices
- 5-Tone and DTMF encoder/decoder
- Normal and priority scan setting
- 50W output power (at 50% duty operation)
- Optional voice scrambler UT-109R/UT-110R and built-in inversion type voice scrambler*
- CW ID transmitter
- Wide frequency coverage
- Built-in audio compander

* Inversion type voice scrambler is not compatible with UT-109/UT-110 voice scrambler.

ADVANCED ALL-IN-ONE REPEATERS

The IC-FR3000 series are designed with advanced heavy-duty performance to support all types of commercial radio applications. A host of standard features and guaranteed Icom performance satisfies your communication needs.

VHF REPEATER
IC-FR3000
UHF REPEATER
IC-FR4000

Supplied Accessories (May differ according to version)

- AC power cable
- Spare fuses

50 Watt continuous full duty cycle operation

A rugged heatsink, large cooling fans and a high performance power module provide the repeater with a stable 50W at full duty cycle operation.

Automatic battery backup system

A built-in backup system supports automatic switching to an external power supply (13.6V DC) if the AC power supply fails.

CTCSS, DTCS, 2-Tone, 5-Tone, DTMF encoder/decoder

Multiple signaling systems are equipped as standard. These systems are fully compatible with Icom F-series radios.

Internal space for duplexer and isolator

The repeater has an internal space to install a duplexer and isolator*. The controls of the duplexer are accessible from the front of the repeater without disassembly. Faster and easier maintenance and adjustment is possible.

* Ask your dealer for details about available duplexers and isolators.

Other features

- Telephone interconnect capability
- DTMF remote control capability
- Optional wall mount bracket, MB-77 and 19 inch rack mount bracket, MB-78
- Accessory connector (D-sub 25-pin) on the rear panel for trunking controller
- Compatible with VEGA tone remote control system
- Optional Voice Scrambler UT-109 or UT-110
- CW ID transmitter (DTMF or 5-Tone also selectable)
- Password and kill/stun function for security
- 16-digit alphanumeric display
- Self check function checks for internal errors and alerts with a phone call
- Master/Slave backup operation by connecting two repeaters

THE IDAS SYSTEM BRIDGES THE GAP BETWEEN ANALOG AND DIGITAL

IDAS is the Icom's first digital land mobile radio system using the NXDN™ communication standard and has complete system components including handheld, mobile radios and repeaters. It offers advanced calling features including selective calling, status message, radio stun/kill/revive and more. It is an ideal for business and industry users who migrate from the 25kHz channel spacing to 6.25kHz channel spacing, providing a future migration solution now for both new or existing systems.

Digital/analog mixed mode operation

The IDAS radio can receive both analog and digital mode signals on a single channel. You can gradually introduce IDAS radios, while using the existing analog radios in a system, adding the digital capabilities without any down time on your existing analog system.

Double your channel capacity

The IDAS radio utilizes 6.25kHz narrow channel spacing, which within a 12.5kHz channel, you can create two offset 6.25kHz channels. (i.e. doubling the channel efficiency and capacity.) You can use these channels, for example, in a one for voice and one for data communication configuration.

Improved audio quality

The 6.25kHz narrow channel spacing provides better receiver sensitivity and further communication coverage than comparable 12.5kHz/25kHz channel spacing like analog FM mode. The IDAS radio uses the AMBE+2™ codec providing clear audio with a simple simultaneous data communication feature.

Network interface*1

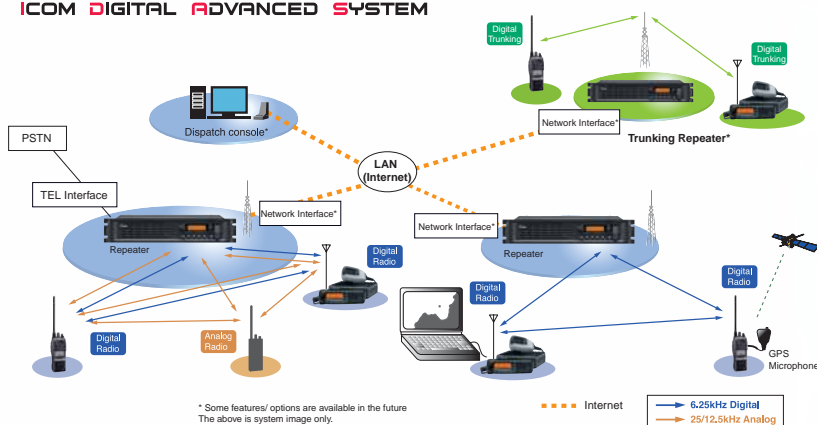

The IDAS repeater has a network interface and can be connected to a LAN or the Internet via Ethernet cable. Communication range is vastly extended by the Internet connection. When connected to a PC via a LAN or the Internet, you can remotely maintain the repeater configuration from your PC.

Digital trunking*1

The IDAS repeater will also have digital trunking capability in the near future. This will allow you effective channel management by sharing multiple channels with a large number of users.

mon air interface
repeater. Useful
ve, etc., IDAS is
ng to the narrow
ing systems.

VHF REPEATER
IC-FR5000
UHF REPEATER
IC-FR6000

Selective call, group call and talk group ID

The IDAS radios allow you to call individual or group users. The radio automatically sends its own ID number while holding the PTT button. The IDAS radio memorizes up to 500 each of individual/group ID numbers and alias names in the table. The alias name or individual/group ID is displayed on the LCD while receiving a message allowing you to identify who is calling.

Secure communication

The IDAS system provides digital voice scrambler using a 15-bit key (about 32,000 keys) encryption algorithm as standard.

Emergency call functions

When the emergency button is pushed, the emergency signal will be automatically sent to the dispatcher or another radio. The emergency man down function* with the optional man down unit, UT-124R, and the lone worker function are also available.

* IC-F3161D series only.

Other features

- Status message send and request
- 4800 bps data communication capability*
* Error correction, control data, etc, will reduce number of bits available for actual data communication.
- GPS position reporting with optional HM-170GP
- Radio stun/kill/revive functions
- RAN (Radio Access Number) for digital code squelch or selcall
- Radio check function allows you to verify if another radio is within communication range
- Call log displays the received call history
- Call alert function allows you to send a beep sound instead of a voice call

*1 Some features are planned for release in the future

LTR/PassPort Version

IC-F43TR

Compliant with NTS Release 2.2

Supplied Accessories (May differ according to version)

- Battery pack, BP-232N
- Belt clip, MB-94
- Antenna

THE IDEAL SUBSCRIBER UNITS FOR UHF SMR AND ESMR OPERATIONS

Many of today's Community Repeater and Specialized Mobile Radio (SMR) operators. Also, the new Enhanced Specialized Mobile Radio (ESMR) network solutions are. IC-F620/F621TR are the perfect subscriber units for this strong and viable market. your existing system's potential.

Multiple modes

The IC-F43TR and F620/F621TR offer basic LTR™, Pass-Port and conventional operations in one unit. Conventional operation and talk-around are both available with the touch of a button, even while you are operating in LTR™ or Pass-Port mode.

LTR™ Features and Select Call

The IC-F43TR and F620/F621TR offer maximum flexibility to program up to 50 systems or up to 250 groups per system. All basic LTR™ features, including direct phone calling and wide-narrow channel spacing are available. The IC-F621TR offers an optional DTMF microphone, HM-152T, allowing for direct dialing, while with the keypad version of the IC-F43TR has the direct dialing capability.

PassPort Features — NTS Release 2.2

- Individual Selective Call (MIN call) — Allows private call between individual members within a fleet.
- Display MIN Text — While in group conversation, you can see the name of the calling party in the display, instead of the MIN number.
- Primary Talk Group — "All Call" allows individual users to call all groups in the fleet.
- RSSI (Receive signal strength indicator) — Detects the strongest signal site, providing seamless roaming.
- Site Lock — Allows the user to lock the radio onto the current site to avoid roaming.

Wide Bandwidth, Plenty of Power

The IC-F621TR offers two versions that cover 400–430MHz and 440–490MHz. The IC-F43TR offers two versions that cover 400–470MHz and 450–512MHz. And all versions provide switchable 12.5/25 kHz width by channel. Because the IC-F621TR offers a full 45 watts of power, it provides more reliable handshakes at the edge of a system's footprint.

ND

operators are considering the emerging business opportunities in UHF trunking. An effective strategy for the traditional dispatch market. The Icom IC-F43TR and IC-F620TR/IC-F621TR. Conventional operation, basic LTR™ and PassPort are all built-in to maximize

Voice scrambler function

The optional voice scrambler unit, UT-109, provides secure communication in all operating modes.

Man down function

With the optional man down unit, UT-124, the IC-F43TR automatically sends an emergency signal when the transceiver is left in the horizontal position for a pre-set time. This function also works in all operating modes.

Advanced PC programming

You may assign operating modes, default talk group for home button, power-ON home or previous group, network roaming, offset frequency by channel, LTR polarity by system, home channel and area bit by system, Tx and Rx ID, and UID for PassPort.

Other features

- Military grade durability, tested to MIL-STD 810
- Multiple scan mode
- Dynamic Talk Around
- Built-in audio compander (IC-F43TR only)
- Dead beat disable, ASID text, and more...

LTR/PassPort Version

UTILIZING THE ADVAN OF THE MDC 1200 SYS

The MDC 1200 system enhances the transceiver's signaling capabilities with Se of markets including security services, plant security, transportation, etc.,. Icom's cost effectively, while providing the advantages of Icom quality and value.

PTT ID*

The radio automatically sends its own ID number when the PTT button is pushed or released. Everyone in the system will know who is calling.

SelCall (Selective Call)*

In the MDC 1200 system, each radio has a unique ID number to make a selective call. The radio memorizes alias names and ID numbers may be used in the table.

Call alert*

The call alert function allows you to send a beep sound instead of a voice call.

Status*

You can set up to 16 conditions such as "on duty", "at lunch" or "in route" and send your status to another unit or the dispatch. You can also request* to send a status message from other unit to know their current status.

Message*

You can send and receive a preprogrammed text message instead of voice. 16 message codes are programmable. It improves channel efficiency by sending messages in digital format.

Emergency function*

The emergency call function allows you to send an emergency signal until the dispatch acknowledges the emergency signal. If the dispatch acknowledges an emergency message, the dispatcher can make the radio transmit whatever the radio microphone picks up for a preprogrammed period.

STAGES STEM

MDC 1200 Compatible

selective call, PTT ID and emergency call functions. It is ideal for a wide variety
s MDC 1200 compatible models easily integrate into an existing MDC 1200 fleet

Radio stun and revive*

The radio stun function disables a lost or stolen radio over the air, eliminating security threats from undesired listeners. When the radio receives the stun command, all functions will be locked out until the revive command is received. The radio* can also send radio stun and revive commands.

Other features

- Radio check function* allows you to verify if another radio is within communication range
- Up to 5 different combinations of MDC profiles are available* in a radio
- External output* turns on a connected external device such as a siren or alarm strobe light, when it receives a selective call, call alert or emergency call
- Call log* displays the received call history including type of call, caller name and called time
- Emergency man down (optional UT-124/R required) and lone worker functions*

* Depending on models, some MDC functions are not available.
Please see the MDC function chart for details.

SOPHISTICATED MPT TRUNKING FOR FLEXIBLE CUSTOMIZATION

From small groups to large scale fleets, Icom's MPT trunking radios provide reliable communications over MPT trunking networks. By connecting a PC, MAP 27 (Mobile Access Protocol) interface allows data exchange capability over the air.*

*IC-F610/F620 only.

Compatible with MPT1327/1343 networks

Dispatcher, individual, group, emergency, priority and telephone* (PSTN and PABX) calls are available via voice or status calls.

* Trunking network must be connected to PSTN/PABX.

Ease of use

An alphanumeric display, audible tones, 15 call back memories and backlit keypad provide simple operation. The handheld and mobile radios provide complimentary operation and functions to each other.

Short Data Message (SDM)

With the DTMF keypad*, short data messages can be sent directly. 32 status call codes are also available.

* Optional HM-152T is required for mobile radios; Keypad versions (IC-F43GT) only for handheld radio.

MAP 27 data capability (IC-F610/F620 only)

MAP 27 data interface allows wireless data communication by connecting a PC or other terminals with an RS-232C interface.

Conventional CTCSS operation

32 conventional channels with CTCSS signaling are available for operation even in out of service areas.

Other features

- 40 phone memory banks with alphanumeric names
- Optional voice scrambler, UT-109
- 5-digit routing code for abbreviation dialling
- Automatic transmit output power selection
- Built-in audio compander. Own and 3rd party divert calls
- Flash ROM CPU . Rewritable system messages
- Advanced PC programming capability, and more...
