This is your portal to a wide variety of communications accessories: handheld radio pouches, mobile radio packs, travel cases, AC and DC Power Supplies, Solar recharging systems, GPS devices, and a variety of 12V Accessories.

Recommended Products

Review a collection of our most popular products: the Radio GearHarness, Radio Wallet™, the DXpedition Pack™, the Radio Box™, the QuickZip Radio Pouch and the Remote HeadCase.

HT Leather or Neoprene Pouches

Soft glove quality leather protects your HT from damage in style. Neoprene styles are fully finished and provide rugged outdoor cushioning. Beautifully constructed, innovative designs for many of the new HTs.

Mobile Radio Packs and Travel Cases

Includes the new Worldpouch™ case for the FT-817, the WorldPack which fits MANY models of mobile radios, and the TransPorter™ for the FT-90 or FT-1500. The new mini mobile radios fit perfectly in these sturdy padded nylon cases. Power supply kits are available to make them fully operational stand-alone portable stations.

FT-817 & Worldpouch Accessories

Choose from mini all-band antennas, antenna pouches, both rechargeable and C-Cell power supplies (all of which beat the standard products, hands down!) and flexible solar cell rechargers.

Emergency Communications Box

With the simple addition of your 5 watt handheld radio, you can have a stand-alone emergency communications station in a box. Heavy duty, waterproof box holds a variety of options from the bare bones power station to the complete setup with solar cell, inverter, RF amplifier, 1/2 wave portable antenna and more. Choose the box for your needs, and be assured of instant communications when emergencies strike (and in good times - its great for field days, camping trips and power outages at home.)

AC / DC Portable Power Supplies

A variety of hand-portable AC / DC power supplies that provide from 50W to 600W of rechargeable AC power that can go with you anywhere

DC Power Supplies

When all you need is DC power, these hand-portable power supplies offer from 10 to 200 amps of clean DC power.

Solar Recharging Systems

All those little extras to make your life a little easier out in the field: Solar cells, DC lighting, meters, adapters, extension cords, and more.

GPS Handhelds and Family Service Radios

The latest in compact, handheld navigational and mapping tools. Also, Family Service Radios for radio communications without any licensing required.

12 Volt Accessories & Parts

A variety of plugs, cords & chargers along with some useful 12V appliances. You will also find parts for PowerPort power supplies.

Mini All-Band Antenna ATX-Walkabout

Trying to tune in the world from a mountaintop with your FT-817? England's finest mobile antennas just got a little closer to home! We are now carrying the cream of Waters & Stanton mobile radio antennas *designed specifically for the Yaesu FT-817*. These are ultra light, ultra-compact antennas which have incredibly excellent performance for such a small package. The entire line is great, but I must admit that my favorite is the ATX- All Band Walkabout antenna. Using technology similar to the Outbacker[®], the ATX multiband antenna is a design of tapped coils with a wandering lead, but on a miniature scale. The entire coil and tap section is only 1" long, but this incredible antenna works in all bands between 6 and 80 meters! Just tap into the band that you want and you're ready to go! With a removable telescoping whip section, the entire package can fit into the palm of your hand. It's a backpackers

dream! Just think of it – an entire all-band-all-mode radio station in a *fanny pack!* Get out of the house, get out of the car, and keep on going!

Waters & Stanton All-Band Sub-miniature antenna

Emergency Radio Go-Box

[Astronomy Supplies](#)
[Recreational Gear](#)
[Emergency Response](#)
[About Cutting Edge](#)
[Field Notes](#)
[Your Privacy](#)

With the simple addition of your 5 watt handheld radio (or your mobile), the Emergency Communications Go-Box has everything you need to maximize the TX and RX capabilities of your radio in field operations. The Emergency Go-Box provides you with a great set of options and functionality to meet all of your portable communications needs. Built around a 12V sealed AGM battery, the kit includes options for AC and multiple DC charging choices, a 30W RF amplifier, 1/2 wave portable antenna, and a choices of 25W solar panel and AC charging.

We have designed this kit to provide all of the parts and pieces in one, compact, waterproof box to provide a stand-alone station for vital communications needs. This kit overcomes the two main limitations of a hand held: limited power and limited antenna range. And unlike the mobile rig in your auto, this is fully portable and can be set up anywhere. Amateur Radio operators are the backbone of emergency response - this ready-to-go box is your key to first response.

[Click on the links for in depth information on each configuration.](#)
